WORK EXPERIENCE

30/09/2019 - now

Researcher

Institute of Crystallography (IC) of National Research Council (CNR), Montelibretti Division, Area della Ricerca Roma 1 Via Salaria Km 29,300 00015 Monterotondo – RM (IT)

<http://www.ic.cnr.it>

- Immobilization of plasmonic nanoparticles on substrates,
- spectroscopic and photothermal characterization of nanoparticle-functionalized substrates, functionalization of nanoparticle-based platforms with bioreceptors,
- investigation of sensing and biosensing properties,
- fabrication and characterization of colloidal metasurfaces for biosensing applications,
- synthesis and functionalization of colloidal plasmonic nanoparticles

Fundamental scientific research (public research)

15/07/2019-15/09/2019

Scholarship

National Interuniversity Consortium of Materials Science and Technology and Via Giusti, 9 50121 Firenze (FI) and Department of Chemistry, Bari University “Aldo Moro”, Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Prof. M. Lucia Curri

- Scalable synthesis study of titanium oxide nanocrystals using sol-gel approaches for photocatalytic applications in the environmental field

Fundamental scientific research (public research)

01/04/2018-31/03/2019

Scholarship

Institute of Institute of Chemical and Physical Processes (IPCF) of National Research Council (CNR), Bari Division, at Department of Chemistry, Bari University “Aldo Moro”, Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Prof. M. Lucia Curri

- Synthesis and characterization of smart nanostructured materials for the environment and cultural heritage protection

Fundamental scientific research (public research)

01/02/2017 - 31/01/2018

Scholarship

Institute of Institute of Chemical and Physical Processes (IPCF) of National Research Council (CNR), Bari Division, at Department of Chemistry, Bari University “Aldo Moro”, Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Dr. Chiara Ingrosso

01/03/2013 - 28/02/2016

- Photocatalytic study on nanocomposite materials based on semiconductor nanoparticles for sensing applications
Fundamental scientific research (public research)

01/01/2010 -31/12/2012

Scholarship

Institute of Institute of Chemical and Physical Processes (IPCF) of National Research Council (CNR), Bari Division, at Department of Chemistry, Bari University "Aldo Moro", Via Orabona 4, 70126, Bari (BA) Scientific Supervisor Dr. Roberto Comparelli

- Photocatalytic study of nanocomposite materials based on nanoparticles for environmental application
Fundamental Scientific Research (public research)

01/07/2012 -31/10/2012

Ph.D Training

Department of Chemistry, Bari University "Aldo Moro", Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Prof. Angela Agostiano

- Nanocrystal-based heterostructures and nanocomposite for photocatalysis
Fundamental Scientific Research and education (public research)

01/11/2009 - 01/01/2010

Visiting Student

Advanced Oxidation Processes Group (GPAO), École Polytechnique Fédérale de Lausanne; Scientific Supervisors Prof. J. Kiwi and Prof. C. Pulgarin

Characterization and self-disinfecting activity of metal oxide nanoparticles sputtered onto polyester textile

Fundamental Scientific Research and education (public research)

Scholarship

Institute of Institute of Chemical and Physical Processes (IPCF) of National Research Council (CNR), Bari Division, at Department of Chemistry, Bari University "Aldo Moro", Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Dr. Roberto Comparelli

- Characterization of the photocatalytic properties of nanostructured catalysts deposited on substrates
Fundamental Scientific Research (public research)

EDUCATION AND TRAINING

01-01-2010-16-04-2013

Ph.D. Title in Chemistry of Innovative Materials

EQF 8

Department of Chemistry, Bari University "Aldo Moro", Via Orabona 4, 70126, Bari (BA); Scientific Supervisor

- Synthesis of nanoparticles and nanocomposites, by "hot injection" methods, and photochemical methods.
- Surface functionalization of by chemistry exchange procedures
- Nanoparticle characterization techniques (UV-Vis absorption spectroscopy, Reflectance spectroscopy, Photoluminescence spectroscopy, AT-IR Spectroscopy, XPS Spectroscopy)
- Morphologic techniques (SEM/EDS, AFM, Optical Microscope, TEM, Profilometry);
- Regulation En 15802, 2010 For The Determination Of Static Contact Angle Of Surfaces;
- Testing the photocatalytic activity of materials, nanomaterials surfaces, and coatings (ISO standard 10678:2010);
- Plasmochemical method for the treatment of Surfaces: Direct Current Magnetron Sputtering and Direct Current Pulsed Magnetron Sputtering
- Preparation of nanocomposite-based coatings and immobilization on conventional and unconventional substrates (casting, spin-coating, dip-coating, spray-coating)
- Test of bactericidal activity of nanomaterials and nanocomposites by E. Coli inactivation experiments (ISO 10705- 2:2000 for the detection and enumeration of bacteriophages).
- Air free techniques: use of the Schlenk line and the Glove box

2000-2008

Master Degree in Chemistry

EQF 7

Department of Chemistry, Bari University "Aldo Moro", Via Orabona 4, 70126, Bari (BA); Scientific Supervisor Prof. Angela Agostiano. Research project: "Nanocrystal composite based catalysts for degradation of organic molecules"

- Synthesis of nanoparticles and nanocomposites, by "hot injection" methods, and
- photochemical methods.
- Nanoparticle characterization techniques (UV-Vis absorption spectroscopy, Reflectance spectroscopy,
- Air free techniques: use of the Schlenk line and the Glove box

WORK ACTIVITIES

Awards

Best Oral presentation award, at Italian Physical Society congress, 2018, section: Applied physics, accelerators, and cultural heritage Photoactive semiconductor nanocrystals for surface protection of architectural stone

Scholarship "Sara Diomede" as the Best Doctoral Thesis in 2013, at School in Chemical and Molecular sciences, University of Bari

Editorial activity

Reviewer for the journals: Chemical Engineering Journal, Applied Catalysis B: Environmental Chemosphere, Analytica Chimica Acta (Elsevier); Environmental Science and Pollution Research (Springer); Environmental Science: Nano (Royal Society of Chemistry);

Guest editor for the special issues:

Nanomaterials in Photo (Electro) Catalysis, Catalysts, MDPI;

- https://www.mdpi.com/journal/catalysts/special_issues/NPE_catalysts

Catalysts in Bacterial Inactivation and Environmental Cleaning, Catalysts MDPI

- https://www.mdpi.com/journal/catalysts/special_issues/bacte_environ_catalysts

Invited presentations

16-September-2020 "Nanomateriali e nanotecnologie, corso di aggiornamento professionale" o Nanoinovation 2020, Roma, Facoltà di Ingegneria "Nanomateriali e nanotecnologie in architettura e in edilizia

4 October 2018 at Institute of Fundamental Technological Research Polish Academy of Sciences", Varsavia, Republic of Poland, "Smart nanomaterials: a new route towards novel environmental and biological applications"

PERSONAL SKILLS

Mother tongue(s)

Italian

Other language(s)

ENGLISH, CAMBRIDGE ENGLISH FIRST (fce2 O B2 FIRST)

MARCH, REFERENCE NUMBER: 183IT3450008

Job-related skills

- Synthesis plasmonic nanoparticles
- Immobilization of nanoparticles by Layer-by-Layer assembly
- Fabrication of colloidal metasurfaces for sensing applications
- Use of hight resolution thermal camera for evaluation of photothermal behaviour of nanomaterials

Digital skills

Advanced level skills in Microsoft Office Suite, Origin 2020 and Image J software for analysis of microscopy images,

Other skills

- Co-supervisor of MSc at Sapienza and Bari Universities
- Scientific responsible for CNR IC of the scientific agreement between the Montelibretti division of CNR-IC and the Department of Medical-Surgical Science and Biotechnologies, Sapienza University of Rome, Protocol number 0000066/2021, 18/01/2021

ADDITIONAL INFORMATION**Statement of Research Interests**

The research activity aims at developing new multifunctional plasmonic platform (rigid or flexible substrates), based on nanoparticle assembly, able to exploit the Localized Surface Plasmon Resonance phenomenon for the qualitative and quantitative detection of pathogens and biomarkers. The plasmonic platforms are conceived as versatile and label-free optical devices for "point of care" and "point of sampling" analysis in water and in biological fluids.

The research interests include investigating chemical and physical approaches for the nanoparticle bio-functionalization and incorporating suitable microfluidics circuits to achieve multiple and near-field analyses both for environmental and health-related applications. The investigated devices can provide valuable support also for monitoring the circulation of emerging diseases. The research also explores the nanoparticle's photothermal-induced self-disinfecting ability to prevent the release of pathogens and antimicrobial resistance genes in the environment.

Publications

total number of publications in peer-review journals: 32

total Impact Factor (IF) (average IF/paper): 9.83

total number of citations: 739

H index (Scopus): 15
