 [www.ic.cnr.it](http://www.ic.cnr.it) ORCID: 0000-0003-1415-8725

Gender Male | Date of birth 21 April 1960 | Nationality Italian, Albanian

## OCCUPATIONAL FIELD

Public research

## WORK EXPERIENCE

January 2021 – Present

**Senior scientist (full time / permanent position). Register Code: 10156**

Institute of Crystallography-CNR, Via G. Amendola 122/0, 70122 Bari (Italy))

Crystallography applied in biology and material science.

Head of Bio-Crystallization Laboratory

**Business or sector** Research

February 2006 – December 2020

**Scientist (full time / permanent position). Register Code: 10156**

Institute of Crystallography-CNR, Via G. Amendola 122/0, 70122 Bari (Italy))

Crystallography applied in biology and material science.

Head of Bio-Crystallization Laboratory

**Business or sector** Research

May 2001 – January 2006

**Researcher (project contract)**

Institute of Crystallography-CNR

Via G. Amendola 122/0, 70122 Bari (Italy)

Developing methods in Crystallography applied in macromolecules

**Business or sector** Research

January 2000 – May 2001

**Researcher (project contract)**

Consorzio Interuniversitario per le Applicazioni di Supercalcolo per l'Università e Ricerca (CASPUR). Rome, Italy (Italy)

Parallel Computing applied on Crystallographic Software for phasing problem at proteins

**Business or sector** Research

October 1994 – September 1998

**Visiting Professor**

Istituto di Ricerca per le Metodologie Cristallografiche

c/o Dipartimento Geomineralogico, Università degli Studi di Bari

Via Orabona, 4 70125 Bari (Italy)

Methods in Protein Crystallography

**Business or sector** Research

May 1985 – May 1992

**Assistant Professor (full time / permanent position)**

General and Inorganic Department, Tirana University, Tirana (Albania)

Lectures for General and Inorganic Chemistry course. Research at electrochemistry of metal corrosion, x-ray Powder Diffraction

Business or sector Education and Research

**VISITING AND TRAINING****May 2016 CNR short-term mobility project**

ISIS - Neutron and Muon Source Science and Technology Facilities Council Rutherford Appleton Laboratory. Didcot, Oxfordshire, United Kingdom  
X-rays and Neutrons to study Smart NanoMaterials

**October 2015 CNR short-term mobility project**

Beamline I22, Diamond Light Source Ltd. Chilton, Didcot, Oxfordshire, United Kingdom  
Characterization by SAXS of nanoparticles (Au, Ag) conjugated to biomolecules

**May 2013 CNR short-term mobility project**

Institut für Physik der kondensierten Materie. Lehrstuhl für Kristallographie und Strukturphysik Erlangen, Germany  
Study and Characterization of hybrid nano-materials inorganic/organic

**October 2012 EMBO Practical Course**

EMBL c/o DESY Hamburg, Germany  
Solution scattering from biological macromolecules

**December 2011 Internship**

Beamline cSAX12 c/o Paul Scherrer Institute Villigen, Switzerland  
Training in scanning Small-Angle X-ray Scattering (SAXS) and Wide-Angle Scattering (WAXS)

**May 2009 CNR short-term mobility project**

Protein Crystallography Station at Los Alamos National Laboratory (LANL). Los Alamos (NW), USA  
Experimental neutron scattering methods and solving the phase problem in neutron diffraction based on D2O/H2O contrast data

**June 2008 CNR short-term mobility project**

Protein Crystallography Station at Los Alamos National Laboratory (LANL). Los Alamos (NW), USA  
Training in experimental use of unique TOF-Laue neutron diffraction methods for hydrogen structure of enzymes. Adapting of "FreeLunch" procedure (developed by IC-CNR) to the neutron diffraction data

**March 2008 Internship**

Membrane Protein Laboratory (MPL). c/o Diamond Light Source Ltd. Didcot, Oxfordshire, United Kingdom  
Training in Protein Crystallization procedures. Researching algorithms related to Crystallography data analysis and processing. Developing procedures for dealing with difficult data

**December 1999 Internship**

Consorzio Interuniversitario per le Applicazioni di Supercalcolo per l'Università e Ricerca (CASPUR). Rome, Italy  
Parallel computing techniques

**January – October 1997 Internship**

Programme for Training and Research in Italian Laboratories (ICTP). Trieste, Italy  
Methods on crystallography

January 1991 – February 1992

### UNESCO Internship

Laboratoire de Cristallochimie du Solide, Université Paris VI, Paris, France; Laboratoire des Agrégats Moléculaires et Matériaux Inorganiques. Université Montpellier II, Montpellier, France  
Crystallochemistry, X-ray Powder Diffraction, EXAFS, XANES

## RESEARCH ACTIVITIES

- Study by crystallography and Small-Angle-X-ray-Scattering of proteins, and their complex, involved at ribosomopathy diseases as Shwachman Diamond Syndrome.
- Structural Analysis of the Partially Disordered Protein EspK from Mycobacterium tuberculosis
- Structural insights into the intracellular region of the human magnesium transport mediator CNNM4.
- A biophysical and structural study of chitinases from Agave tequilana and their potential role as defense proteins.
- X-ray scanning microscopies of microcalcifications in abdominal aortic and popliteal artery aneurysms Effects of processing on structural, mechanical and biological properties of collagen-based substrates for regenerative medicine
- Scanning Small- and Wide-Angle X-ray Scattering Microscopy Selectively Probes HA Content in Gelatin/Hydroxyapatite Scaffolds for Osteochondral Defect Repair
- MMP3 inhibition by platinum-based complexes binding sites and conformational flexibility
- Crystallographic analysis of metal-ion binding to human Ubiquitin protein
- Developing of the phasing techniques to solve the macromolecules structure from X-ray and neutron diffraction data. Techniques for improving the electron density maps, for an automatic model building, using data extrapolations beyond the observed resolution (FreeLunch procedure) and a novel difference Fourier synthesis (DEDM). New computational tools for H/D determination in protein structure from neutron data.
- New formulations in Joint Probability Distribution function applied in SIR/MIR, SAD/MAD and molecular replacement techniques. Co-author of a software package for a global phasing for proteins: ILMILIONE [Burla et al, J. Appl. Cryst. (2007), 40, 609-613.]
- Scanning SAXS/WAXS analysis applied to the study of human bone sections, obtaining detailed maps of bone structure, in healthy and pathologic (dwarfism, Paget's, Osteorarthritis) samples. The analysis, performed on synchrotron data, highlighted the differences in orientation and degree of orientation of the HA mineral fraction in the bone, providing a new possible means to understand bone diseases.
- Structural/morphological characterization of nanostructured (bio-) materials, in particular by means of small and wide angle x-ray scattering (SAXS and WAXS), even in grazing incidence geometry (GISAXS and GIWAXS), and X-ray reflectivity. Developing and Improving of the algorithms for data analysis.
- Main scientist developer for package SUNBIM [Siliqi et. al. J. Appl. Cryst.(2016). 49, 1107–1114 6]
- Author of more than 120 articles published in International Journals; WOS: h-index: 21; Total Citations: 1814; GOOGLE SCHOLAR h-index 24; Total citations 2225

## SELECTED TEACHING AND LECTURES

- 2021 – 1st National Congress of the Mexican Society of Synchrotron Light and 1st International Congress Synchrotron Light Technique. Guanajuato, Mexico, 21-26 June 2021. "Small Angle X-ray Scattering (SAXS) in combination with other techniques, experimental and non, to deal with some tough protein structures". Plenary Lecture

- 2019 – Teaching and tutorials on "Small-angle X-ray scattering" Open SESAME HERCULES School, Sesame Synchrotron, Jordan. (26 October - 08 November)  
– Seminars "SAXS and WAXS: study of nano- and biomaterials", Department of System Innovation, The University of Tokyo, Japan. (27 September - 4 October)  
– "Shwachman-Diamond Syndrome: SBDS and EFL1 conformational characterization through Small Angle X-ray Scattering and Molecular Dynamics Simulations", MISCA V: Fifth Meeting of the Italian (AIC) and Spanish Crystallographic (GE3C) Associations, Napoli, Italy (4-7 September 2019)  
– Seminar "Rare diseases and common problems to deal with them: Shwachman-Diamond Syndrome and Small – Angle X-ray Scattering (bioSAXS) technique", Dipartimento di Medicina Molecolare, Università di Pavia, Pavia, Italy. (13 June 2019)  
– Seminar "Rare diseases but common problems to deal with them: Shwachman Diamond Syndrome from X-ray scattering to modeling techniques", IRBM Science Park, Pomezia. (10 May)  
– May. Seminar "Dalla Biologia Strutturale alla Chemioinformatica: Approci Innovativi per le nuove strategie terapeutiche" Università "La Signora di Buon Consiglio", Tirana, Albania. (19 May)
- 2018 – "Characterization of the interaction between the EFL1 GTPase and the Shwachman-Diamond Syndrome missense mutants", 3rd Joint AIC-SILS Conference, Rome, Italy (25-28 June, 2018).
- 2017 – "Schawman-Diamond Syndrome: inside the structure of EFL1, SBDS proteins and their complex", American Society for Cell Biology (ASCB) and European Molecular Biology Organization (EMBO) Meeting, Philadelphia, USA (2-6 December)  
– "When rare is common". International Conference on Applied Sciences and Engineering 2017 (ICEAS 2017), Tirana, Albania (16-17 November)  
– Organization of the Workshop "X-ray Scattering in Biology and Material Science" , UNAM, Mexico City, Mexico. (23-24 October)  
– "Protein Complex Structures: combining X-ray scattering, crystallography and modelling". School of Nanomedicine 2017, Bari, Italy (11-13 October)  
– 2017 "Shwachman-Diamond Syndrome: a rare genetic disorder and a tough challenge for the structural characterization of the proteins and their complex involved in the ribosome biogenesis" 25th Congress of Italian Crystallographic Association (AIC) Perugia, Italy (26-29 June).  
– Seminar "Using BIOSAXS for the structural characterization of the proteins and their complex involved in the ribosome biogenesis", Department of Chemistry, Faculty of Mathematical Engineering and Physical Engineering Polytechnic University of Tirana, Albania. 8-9 May  
– "SUNBIM: a scientific package for X-ray imaging of nano- and biomaterials using SAXS, WAXS, GISAXS and GIWAXS techniques". First Conference in Computing, Information Technology and Business Application (ICTBA), Durres, Albania (6 May)
- 2016 – Organization of XXIV meeting of SILS (Società Italiana di Luce di Sincrotrone), Bari, Italy (21-23 September).  
– "Small-Angle-X ray-Scattering (SAXS) studies of the lowresolution structure of the ribosomal GTPase EFL1, the SBDS protein and their complex". IV Meeting of the Italian and Spanish Crystallographic Associations, Tenerife, Spain (21-25 June)  
– Organization of IUCr-UNESCO Albania Bruker – OpenLab, Tirana, Albania (30 May - 3 June)  
– "Small angle X ray scattering studies of the low-resolution structure of the ribosomal GTPase EFL1, the SBDS protein and their complex". 8th International Congress on Shwachman-Diamond Syndrome, Verona, Italy. 17-20 April.

#### PROJECT COORDINATOR

CNCCS Consortium Project: WPS S2-WP3 "Sindrome di Shwachman-Diamond (SDS), una rara malattia genetica trascurata: studio conformazionale della proteina EFL1 e screening di piccole molecole organiche capaci di modulare la sua funzione" 2018-2021

Bilateral Scientific Cooperation Project between CNR (Consiglio Nazionale delle Ricerche) and MoES (Ministry of Education and Sport of the Republic of Albania )2018-2020

MAECl Bilateral Scientific/Technologic Cooperation Project Italy - Mexico 2014-2017

Bilateral Scientific Cooperation Project between CNR (Consiglio Nazionale delle Ricerche) and CONCYTEC (Consejo Nacional de Ciencia, Tecnologia e Innovacion Tecnologica) 2012-2014

#### TRANSFER OF PERSONAL DATA TO A THIRD COUNTRY OR AN INTERNATIONAL ORGANIZATION

The data collected, for the pursuit of any of the above institutional objectives, may have to be transferred to a country based outside the European Union (so-called Third country). The European and International Relations Unit ensures that such transfer outside the EU will take place only to third countries which have an adequacy decision of the European Commission (pursuant to art. 45 of GDPR), or to third countries that provide one of the guarantees indicated as adequate under art. 46 of GDPR.

Bari, 14/02/2022
